CAREER OBJECTIVE:

I am a front-end developer focused on creating attractive and user-friendly websites. I am passionate about translating design concepts into interactive digital experiences and continuously improving my skill set to stay updated with the latest industry trends. I specialize in front-end development with expertise in HTML, CSS, JavaScript, React, Tailwind CSS, and Bootstrap. I create responsive, visually engaging web interfaces with efficient Git version control, focusing on user experience and modern design standards to meet project requirements.

TECHNICAL SKILLS

Front-End Development : React.js, JavaScript, HTML, CSS, Tailwind CSS, Redux.

Version Control: Git, GitHub.

Deployment & Hosting: Netlify.

Backend & Database: Firebase.

EXPERIENCE:

Aug 2022 to Nov 2024	Atos Global IT Solution and Service Private Limited
Role: System Engineer	I have accrued 2 years of experience as a System Engineer at Atos, specializing in system optimization and operational efficiency. I am adept at resolving complex problems and implementing effective solutions.

CERTIFICATES:

1. **Guvi ITIL Certification (Present)** (Nov 2023 – Present)
2. **Namaste React Js** (May 2024)
3. **Namaste Node Js** (July 2024)
4. **Cognify Internship** (Feb 2024)

PROJECTS:

1. Project Name: PVR Volleyball Team Web Application. ([Click here](#))

Role: Solo Contribution

Team Size: 1

Project Duration: Present

Project Detail: I am currently developing the **PVR Volleyball Team Platform** using **React JS** and **Tailwind CSS** for a responsive and user-friendly front end. The backend is being built with **Node.js** and **MongoDB** to efficiently handle data. The project aims to enhance team organization and connectivity. This development phase highlights my full-stack development skills and my commitment to creating a robust team management solution.

2. Project Name: Personal Portfolio Website. ([Click here](#))

Role: Solo Contribution

Team Size: 1

Project Duration: 7 Days

Project Detail: Developed a **personal portfolio website** using **React JS** and **Tailwind CSS** to effectively showcase skills and projects. The website features a user-friendly interface with a modern design, highlighting various professional accomplishments and project details. A notable feature is the integrated email functionality, allowing interviewers to send direct inquiries or messages via a contact form.

3. Project Name: Foodzy (Food Ordering Website). ([Click here](#))

Role: Solo Contribution

Team Size: 1

Project Duration: 13 Days

Project Detail: Developed a dynamic food ordering application using **React JS** and **Tailwind CSS**, focusing on enhancing user experience and application performance. Implemented **React Router** to enable smooth navigation between pages without reloading, ensuring a seamless and responsive user experience. Leveraged **Redux** for effective state management and data handling, allowing for real-time updates and efficient management of application state.

4. Project Name: A Dynamic Todo App with Full CRUD Features. ([Click here](#))

Role: Solo Contribution

Team Size: 1

Project Duration: 5 Days

Project Detail: A **React Todo app** with full **CRUD** functionality and local storage for data persistence. This project deepened my understanding of **React** components, state management, and **JavaScript**. I used **Tailwind CSS** for responsive design, enhancing my skills in hooks and local storage integration. This hands-on experience helped me build a functional and user-friendly web application.

5. Project Name: Modern React.js Landing Page with Tailwind CSS. ([Click here](#))

Role: Solo Contribution

Team Size: 1

Project Duration: 4 Days

Project Detail: I have built a React.js landing page! This project enhanced my skills in React fundamentals, component-based architecture, and Tailwind CSS for efficient styling. It features a modern, responsive design with intuitive navigation and optimized performance for all devices. I also improved my problem-solving abilities and used Git and GitHub for version control. ☐ Check out how user experience shines in this project.

6. Project Name: Shopify. ([Click here](#))

Role: Solo Contribution

Team Size: 1

Project Duration: 5 Days

Project Detail: Developed a fully responsive shopping website using React JS and Tailwind CSS, designed for both mobile and desktop users. Implemented features allowing users to view products, add them to a cart, and adjust quantities. Utilized Redux Toolkit for efficient state management, handling cart data and user interactions seamlessly. The project enhanced my skills in responsive design, state management with Redux, and interactive UI development.

7. Project Name: Simple Calculator with JavaScript. ([Click here](#))

Role: Solo Contribution

Team Size: 1

Project Duration: 3 Days

Project Detail: Developed a simple calculator using HTML, CSS, and JavaScript. The calculator performs basic arithmetic operations like addition, subtraction, multiplication, and division. Implemented interactive buttons and an input display to show results dynamically. Used JavaScript functions to handle calculations based on user inputs. Focused on creating a clean, user-friendly interface for seamless interaction.

EDUCATION:

Degree/Course	Institute/College	University/Board	CGPA / Percentage	Year of Passing
B.E-CSE	Rajalakshmi Institute of Technology	Anna University	7.94	2022
12th	CCC.Hr.Sec.School	State Board	72.6%	2018
10th	CCC.Hr.Sec.School	State Board	78.67%	2016

PERSONAL DETAILS:

Address: No 3, Rajeshwari Nagar, Putlur, Thiruvallur - 602025

DOB: 05-07-2000

Languages Know: English, Tamil

DECLARATION:

I here by declare that mentioned above are true to the best of my knowledge.
